INTRODUCING THE CORNERMAX[™] LAZY SUSAN ORGANIZER

New design eliminates the center pole to maximize storage space

BOSSIER CITY, LOUISIANA, AUGUST 15, 2025—Hardware Resources, a leading manufacturer of quality products for the kitchen, bath, and closet industries, has introduced a new organization solution that improves on the traditional Lazy Susan. The new **CornerMax[™] Lazy Susan** maximizes storage space in corner cabinets with unobstructed rotating shelves, perfect for storing oversized cookware and small appliances.

The CornerMax Lazy Susan frame mounts to the inside walls of the cabinet with concealed support arms that give the illusion of floating shelves. It comes with a jig to ensure proper alignment and can be easily installed after the countertop is in place. In addition to eliminating the center pole associated with traditional Lazy Susan designs, the CornerMax features a patent-pending pivot system that utilizes a pin and hub rather than ball bearings for a more stable and quieter spin motion. It is available in 18" round, or 27" and 31" kidney shape options with two adjustable height shelves that rotate 360° independently. The shelves are made from UV-finished birch plywood with a polished chrome rim to keep items securely on the shelf.
