FOR IMMEDIATE RELEASE

NEW KITCHEN VISUALIZER TOOLS FROM HARDWARE RESOURCES

Free resources allow users to create AI-powered 2D and comprehensive 3D kitchen layouts.

[BOSSIER CITY, LOUISIANA – AUGUST 12, 2026] – Hardware Resources, a leading manufacturer of products for kitchen and bath industry, has launched two free kitchen design visualization tools on its website. The 2D visualizer is an AI-powered tool that provides quick inspiration for projects. Simply upload a photo or an inspiration image, and the tool will generate images of the kitchen featuring NorthPoint Cabinetry in different finishes, colors, and door styles. The 2D visualizer is ideal for getting quick inspiration for remodeling or new construction projects. The 3D visualizer is a more comprehensive kitchen design tool that allows users to not only visualize a project featuring NorthPoint Cabinetry but also build detailed plans and generate a product list for simplified ordering. Both tools are powered by Cyncly, a leading software platform for kitchen and bath design professionals.

“Cabinetry is a highly personal decision, and homeowners often need to see different possibilities before they feel confident moving forward,” said Jami Harmon, Senior Product Manager for Cabinetry at Hardware Resources. “These visualizer tools give them the freedom to explore styles, finishes and design ideas on their

own, so they can come to the designer with a clearer sense of what they want. That means more productive conversations, fewer rounds of revisions and a smoother path from inspiration to final design.”

Links to the visualization tools can be found on HardwareResources.com or visit <https://www.hardwareresources.com/kitchen-visualizer-tool>.
