

WATER ST BRASS

VESTIGE

Vestige is a sculptural, highly customizable hardware collection.

The collection draws inspiration from the pure forms of artist Ellsworth Kelly and the bold simplicity of classic 1980s sportswear.

Crafted from solid brass, every piece is available in three considered configurations: all-metal, brass inlay, and wood inlay.

These metal and wood inlays can be matched or contrasted to surrounding cabinetry to support both consistency and variation within a project.

This collection gives designers exceptional control over how hardware interacts with surrounding architecture, materials, and surfaces.

Pure forms, with a considered customization process, Vestige is designed for bespoke interiors and the discerning eye that define them.

Water Street Brass was born in Jamestown, New York, once called the Furniture Capital of the World, and a city long shaped by the conviction that well-made things matter. That legacy is the foundation of everything we produce.

Our skilled artisans in Jamestown craft and finish every solid brass piece to order, bringing genuine care and precision to a complete line of cabinet, door, and furniture hardware. The weight of a pull, the warmth of a finish, the quiet pleasure of a knob that sits perfectly in the palm are the result of deliberate craft, made in the United States.
